

Carbon Reduction Plan

Supplier name: Bruton Knowles Limited
Publication date: 28th April 2026

Commitment to achieving Net Zero

Bruton Knowles Limited is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline year: 2024/25	
Additional details relating to the baseline emissions calculations:	
This is the historic baseline and is our first-year reporting.	
Baseline year emissions:	
Emissions	Total (tCO ₂ e)
Scope 1	117,342.39 kg/CO ₂
Scope 2	20,031.605 kg/CO ₂
Scope 3 (included sources)	
Upstream Deliveries	5,6786 kg/CO ₂
Waste	908,374.06 kg/CO ₂
Business Travel	5785.33 kg/CO ₂
Employee Commuting	48,418.67 kg/CO ₂
Downstream Distribution	441.39 kg/CO ₂
Homeworking	10,240.12 kg/CO ₂
Total emissions	1,167,419.57 kg/CO ₂ or 1167.42 t/CO ₂

Current emissions reporting

Reporting year: 2025/26	
Emissions	TOTAL (tCO ₂ e)
Scope 1	89,226 kg/CO ₂
Scope 2	13,546kg/CO ₂
Scope 3	

Upstream Deliveries	41,526 kg/CO2
Waste	134,448 kg/CO2
Business Travel	1,435 kg/CO2
Employee Commuting	58,585 kg/CO2
Downstream Distribution	570 kg/CO2
Homeworking	10,454 kg/CO2
Total emissions	352,161 kg/CO2 or 352.161 t/CO2

Emissions reduction targets

This is our second carbon footprint report. Our targets for reduction over the next 5 years are set out below:

In order to continue our progress toward achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 933,935.66 kgCO₂e by 2030. This is a reduction of 20%

Bruton Knowles has achieved a substantial emissions reduction, primarily driven by waste diversion and lower fleet activity. To make these reductions durable, the company will codify supplier and waste contracts, accelerate fleet decarbonisation, address rising commuting emissions, and implement robust measurement and assurance. Publication will include verified figures, methodology notes, and clear targets and timelines as set out above. This is in excess of our original reduction target, and we seek to maintain or reduce this level of emission.

Future carbon reduction initiatives

In the future, we hope to implement further measures such as:

- Review of our waste management options and a focus on ensuring that none of our waste is disposed of in a landfill.
- A review of how we make waste and a further push towards paperless offices, reusable cups, and other food wrappings.
- Highlight the potential for using rail travel rather than car travel.
- Further reminders to staff and clients of the environmental benefits of virtual meetings rather than in-person meetings.
- Continue to champion homeworking as an option for our staff.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹³ and uses the appropriate government emission conversion factors for greenhouse gas company reporting.¹⁴

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements (where required), and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.¹⁵

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Nigel Billingsley, Director
